

NaviManager™
Fleet management software

Complete control of your fleet's navigation, 24/7

NaviManager™ enables you to efficiently track, monitor and manage your vessels from the shore, wherever you are. The program can be used via computer, tablet or mobile, so you can keep on top of your fleet at all times.

From a single vessel to a full fleet, NaviManager™ gives you complete control over spend, compliance, voyage planning and location, alongside full fleet-level control and reporting.

With NaviManager™, you can have peace of mind over your fleet's current status, ensuring that your operations are running smoothly and efficiently.

and NaviPlanner™ packages

More about Nautisk™

Nautisk™ has been supplying navigation charts for 120 years, and has become a leading specialist in digital navigation.

When you think of Nautisk™ you'll think of:

- Customer service and support across the world that can help and support you.
- Account managers who want to build relationships and provide first-class service.

- A distributor network that understands navigation and adds value at every stage.
- An online portal that makes your life easy – and compliant.
- An online web shop to find maritime products quickly and at the right price.
- Update services that give you the reassurance that your products are fit for purpose.
- 24-7 support so you can relax, knowing we're there should you need us.

FlatFee™

NaviPlanner™ and NaviManager™ are available through our FlatFee™ service. Choose the right bundle of products at a fixed price to meet the needs of individual vessels.

NaviPlanner™

State-of-the-art voyage planning software, providing end-to-end route planning to ensure safe, compliant and reliable navigation.

- End-to-end voyage and automated route planning
- Manual route creation using maps and waypoints
- Online ENC ordering facility
- Personalised voyage reports
- Includes NaviManager™ FREE.

Neptune™

A back of bridge management software solution, giving you complete visibility and control of your on-board charts and publications – both paper and digital.

- View and manage on-board editions and publications
- Detail inventory status reports
- Data back-up
- Basic route planning
- Includes NaviManager™ FREE.

NaviUpdate™

Simplifies bridge procedures and keeps navigation up to date. Ensures compliance, reduces security threats, minimises data costs and works with existing bridge systems and communication methods.

- Maintains ENC charts
- Works with any ECDIS
- Keeps vessels compliant
- Multiple connection methods including GSM SIM
- Compatible with NaviPlanner™.

NaviManager™ bundles

NaviManager™ is now free with our NaviPlanner™ and Neptune™ digital packages, so you can manage your vessel on-shore, while remaining in control of your voyage on-board, at no extra cost.

The packages work seamlessly together for an efficient and comprehensive digital solution.

Easy to use

From a single vessel to a full fleet, manage your operations easily through NaviManager™. Through one central hub you can control every element of your fleet's navigational needs, from route planning to chart orders.

Compliant

NaviManager™ details full vessel information, including valid ENC permits, and updates documentation and publication requirements based on your route, ensuring you keep compliant.

Efficient

With transparent ordering and detailed reports, you can keep control over all aspects of your fleet's journey, ensuring you are on track and on budget.

Support

Support for NaviManager™ is free of charge and available directly from the program, at the touch of a button.
