

## Neptune™ Vessel information management software

### Manage your vessel information easily and in real-time

Neptune™ is a back of bridge management software solution, giving you complete visibility and control of your on-board charts and publications – both paper and digital.

The PC-compatible software can facilitate real-time updates to virtually any on-board ECDIS. With access to a full range of media, it can help you keep a vessel fully compliant.

Working intelligently, Neptune™ maintains the media inventory, highlights when updates are needed and prompts ship and shore-based staff to order new products or licenses when required.

#### Features

- Compatible with both bridge and shore-based systems. Use on a standalone Windows PC or across a network.
- Access data via satellite, online or email – with our ECTP protocol to overcome data loss in poor signal areas.
- Manageable subscription-based solution for simple budgeting.
- Order products and licences – paper and digital charts (including AIO date), IMO publications.
- Combines electronic Notices from British Admiralty, Norwegian Hydrographic Service, NOAA and Brazilian Hydrographic Service.
- Update service for ENC cells from the UKHO and PRIMAR.
- Integrated management of NTMs, meaning constant access and up-to-the-minute status on individual charts or chart portfolios.
- Provides easy to read, colour-coded reports giving comprehensive overview of onboard charts, publications and correction status.

#### Benefits

- Easy to use without complex training.
- Provides access to a full range of media and detailed inventory status reports.
- View and manage all on-board editions and publications efficiently.
- Seamless integration between paper and digital – with support available to help with your digital transition.
- Built-in back-up function to help you avoid data loss.
- Basic route planning function.
- FREE Nautisk™ NaviManager™, allowing you to track and monitor fleet operations from shore.

## More about Nautisk™

Nautisk™ has been supplying navigation charts for 120 years, and has become a leading specialist in digital navigation.

When you think of Nautisk™ you'll think of:

- Customer service and support across the world that can help and support you.
- Account managers who want to build relationships and provide first-class service.

- A distributor network that understands navigation and adds value at every stage.
- An online portal that makes your life easy – and compliant.
- An online web shop to find maritime products quickly and at the right price.
- Update services that give you the reassurance that your products are fit for purpose.
- 24-7 support so you can relax, knowing we're there should you need us.

## Nautisk™ Outfit Management Service (OMS)

Neptune™ provides a simple and seamless way to manage all of your on-board publications, both paper and digital, anywhere in the world. We offer an Outfit Management Service (OMS), controlled by Neptune with the following features:

### Automatic supply service

Charts and publications are automatically supplied each month, and all vessels subscribed to this service receive an enrolment certificate to confirm the services selected.

### Alteration service

We will advise you of all the monthly alterations to your required charts and publications.

### Chart correction service

We offer a cost-effective correction service, minimising the time taken for officers on board to update any passive or unused charts.

### Admiralty Notices to Mariners

These contain corrections, alterations and amendments for all of the UKHO's series of Admiralty Charts and Publications, which are published on a weekly basis.

### Loose leaf

Admiralty List of Lights and Radio Signals publications are corrected weekly through the Admiralty Notices to Mariners in line with compliance. This service is UKHO approved, and minimises the time taken to apply all corrections by 95%.

## Bridge between paper and digital

Neptune™ allows you to work across paper and digital media, working as a bridge between the two to ensure your operations remain visible and efficient.

## Easy to use

Neptune™ is simple and easy to use, with no complex user training required. The intuitive platform guides you through the process, and provides you with information that's easy to interpret and use – helping you keep your vessel up to date.

## Manage and update to remain compliant

With constant access to the latest updates and notices, Neptune™ allows you to manage and update your publications and charts with the click of a button. The easy to read, colour-coded reports give a comprehensive overview of onboard charts, publications and correction status, so you know what needs updating as soon as it is implemented.

## Compatible with onboard PCs

Neptune™ is easy to install and runs on Windows XP Service Pack 3 or higher, or the full version of Microsoft and .NET Framework version 4.0.

## Support

Support for Neptune™ is free of charge and available 24/7 from our global support team, via phone or email.

## NaviManager™

Enables shore-based staff to efficiently track and monitor their fleet operations. Control spend, compliance, voyage planning and location at vessel and fleet level.

- Full fleet to single vessel control
- Reporting and history
- Compliance dashboard
- Voyage report and positions.
