

Nautisk Environmental Policy

Nautisk is committed to implementing and maintaining the highest quality of environmental standards within our business, and helping our customers achieve the same.

We are minimising the impact of our activities on the environment by:

- Implementing waste recycling systems at our locations across the globe.
- Actively encouraging customers to switch from paper to digital, reducing the environmental impact of global freight and print storage.
- Ensuring products conform to SOLAS and/or flag state regulations.
- Using likeminded partners, such as our packing goods supplier Rajapack, who are ISO 14001 certified.
- Sourcing environmentally friendly packaging, such as our wooden Euro pallets which are used for freight and can be reused or recycled.
- Actively promoting the use of video conferencing over face-to-face meetings, reducing the amount of land/air travel pollution.
- Developing products which can have a positive effect on a shipping company's environmental impacts.

While we take every care to think consciously about our environmental impact on a daily basis, we welcome suggestions of how we might improve.
